

Driving Type : Manuel

Lifting Type : Electric

Operating Voltage : 220 Voltage- 380 Voltage

Capacity: 2000 kg

Machine Lift Height : 1600 mm

Closed Height of the Machine : 2000 mm

Machine Width : 115 cm

Fork Length: 115 cm

Fork Width :160 mm

Forks Far Right / Far Left ( Overall Dimension): 90 cm

Machine Weight : 300 kg

Wheels : Polyamide

Brake : Manuel

The Reels Are Made of Cast Material.

Forks Can Be Manufactured As Fixed or Mobile

#### FEATURES OF SCALE:

Weighing Capacity : 2 Ton

Precision : +/- 5 kg

Loadcell : 2 Pieces, IP68, Class C3

Indicator : K1 Indicator, IP54 Class Protection

Internal Battery : 6 -12 Volts

Charging Time : 45 Minutes – 1 Hour

#### STRONG CONSTRUCTION

#### NET WEIGHING

#### CONNECTING A PRINTER

#### EASY TO USE – INDUSTRIAL

YES 2016-T Weighing Semi Electric Stacker (2 Ton 1.6 M) is designed for loading, unloading, and weighing purposes in areas such as warehouses, containers, and cargo vehicles. With this product, you can perform lifting, carrying, and weighing operations for loads weighing up to 2 tons. Our product has a lifting capacity of 1.6 meters.

The YES 2016-T Weighing Semi Electric Stacker is more cost-effective compared to a traditional forklift. It is easier to use than a pallet jack and allows for the lifting of heavier weights. However, its weighing feature sets it apart, enabling the weighing of loads. You don't need to take the loads to a separate area for weighing; you can weigh them directly with the stacker. This eliminates the need

for extra time and effort for weighing.

These semi-electric vehicles allow for both horizontal and vertical load transportation. Electric power is utilized for vertical lifting. Made from high-quality steel, the stacker ensures that loads are placed in desired locations quickly. Therefore, the YES 2016-T Weighing Semi Electric Stacker contributes to saving time and labor. It also has positive effects on workplace safety.
