

Feature	Value
Driving Type	Manuel
Lifting Type	Electric
Operating Voltage	220 Voltage- 380 Voltage
Capacity	2000Kg
Machine Lift Height	2000 Mm
Closed Height of the Machine	2450 Mm
Machine Width	115 Cm
Fork Lenght	115 Cm
Fork Width	160 Mm

Forks Far Right / Far Left (Overall Dimension)	90 Cm
Machine Weight	340 Kg.
Wheels	Polyamide
Brake	Manuel

The Reels Are Made of Cast Material.

Forks Can Be Manufactured As Fixed or Mobile

The YES2020 Semi Electric Stacker (2 Ton 2.0 M) is an industrial vehicle that offers versatile usage options. Designed with durability and reliability in mind, this vehicle allows you to lift weights up to 2 tons without relying on manual strength. Its unique system enables lifting of loads up to 2 meters in height, making it convenient for stacking or unloading goods in warehouses, containers, and similar areas.

The semi-electric stacker can be adjusted with its forks to suit the task at hand, resulting in more efficient outcomes. Its silent operation not only prevents noise pollution but also avoids causing inconvenience to other personnel in the area.

The manual usage option, which is the reason behind its semi-electric designation, enables the horizontal movement of loads. With the help of polyamide wheels, compact design, and smooth steering, loads can be transported quickly and safely to the desired location.

Using the YES semi-electric stacker from Ekonomik Lift, you can save a significant amount of time and enhance job safety. Tasks that would normally require long hours of manual labor can be completed in a much shorter time period without relying on physical strength.
